Race Targets

Half Oceanman
Oct 03, 2026
In 14 days
Target: 2:05:00
Predicted: ~2:20:09

Treviso 10K Tiramisu Run
Oct 11, 2026
In 22 days
Target: 57:30

Marathon
Feb 07, 2027
In 141 days
Target: 4:02:39

Ironman Italy Cervia
Jun 20, 2027
In 274 days
Target: 11:43:58
Predicted: ~11:02:20

AI Coaching

- Over the last 4 weeks, training volume has been low with only 9 sessions logged, heavily weighted toward cycling and open-water swimming, and no running recorded at all — a significant gap with a 10K race 22 days away. Sleep quality is a concern, with many nights under 5 hours and body battery frequently in the 12–55 range, suggesting accumulated fatigue and insufficient recovery. The Half Oceanman swim in 14 days is the immediate priority, and recent open-water swim efforts at 160–161 bpm suggest the athlete is working at high intensity during swims, which needs to ease into race-pace control this week.
- Prioritise sleep above all else this week — body battery has been critically low (as low as 12) on multiple days, and arriving at the Half Oceanman under-recovered will hurt performance far more than any additional training session.
 - The complete absence of running over the last 4 weeks is a red flag for the Treviso 10K in 22 days — introduce short, easy runs (20–30 min at 6:45–7:00/km) this week and next to re-activate running legs without adding injury risk.
 - Swim HR has consistently been at 160–161 bpm during open-water sessions; shift this week's remaining swim work toward controlled aerobic effort (target HR ≤145 bpm) to practice the pacing discipline required for a 5,000m race event.
 - The planned 120km ride on Sep 26 (Wk14, 17 days before the Half Oceanman) is aggressive given the low recent training load — cap it at 80km and remove the Z3 tempo blocks to avoid digging a fatigue hole heading into the race.
 - Post-Half Oceanman (Oct 3+), allow 2–3 days of full rest before resuming any running load — racing a 5,000m open-water swim will leave the shoulders and aerobic system taxed, and the Treviso 10K is only 7 days later.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):
