> No training data or wellness metrics have been recorded over the past 4 weeks, making it impossible to assess current fitness, fatigue, or adherence to the plan. With a Marathon 85 days away (target sub-4h at ~5:45/km), this is a critical build phase and the absence of logged activity is a concern that needs immediate attention. The upcoming plan is well-structured for Ironman base building, but marathon-specific pace work at 5:45/km should be woven in more deliberately given the race proximity.

- Start logging all sessions immediately — without data from your watch or manual entries, it's impossible to track fitness trends or catch early signs of overtraining or underrecovery ahead of your marathon in 85 days.
- With the marathon 85 days away, your Tuesday interval session (6x800m @ 4:55–5:10/km on 17 Nov) is valuable, but add one weekly tempo run specifically at 5:35–5:50/km sustained for 30–40 min to build race-pace confidence at your 5:45/km marathon target.
- Long run distances of 20–21km are appropriate for this phase, but aim to include the final 3–5km of each long run at or close to marathon pace (5:45/km) to practise negative-splitting and race-pace feel without adding extra volume.
- Malta's November conditions are mild and runnable — take advantage of cooler morning temperatures for long runs to simulate more typical marathon race conditions and build heat tolerance awareness for Ironman Italy next June.
- Prioritise sleep tracking — re-sync your Garmin device or manually log sleep scores so recovery can be properly monitored; with no wellness data available, there is no way to gauge readiness before hard sessions.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):

DATE	DISCIPLINE	PROPOSED	TYPE
2026-11-22	**Running**	20.6km long run with final 4km at 5:45/km marathon race pace, rest of run at 6:15–6:45/km	REPLACE
2026-11-29	**Running**	21.2km long run with final 5km at 5:45/km marathon race pace, rest of run at 6:15–6:45/km	REPLACE
2026-11-26	**Running**	Tempo run 35min @ 5:40–5:50/km — deliberately kept at the slower end of the tempo band to	REPLACE
2026-12-06	**Running**	21.8km long run with final 6km at 5:45/km marathon race pace, rest of run at 6:15–6:45/km	REPLACE
