Race Targets

**Half Oceanman**
Oct 03, 2026
In 58 days
Target: 2:05:00
Predicted: ~2:07:30

**Treviso 10K Tiramisu Run**
Oct 11, 2026
In 66 days
Target: 57:30
Predicted: ~56:39

**Marathon**
Feb 07, 2027
In 185 days
Target: 4:02:39
Predicted: ~3:59:04

**Ironman Italy Cervia**
Jun 20, 2027
In 318 days
Target: 11:43:58
Predicted: ~16:33:43

AI Coaching

The last 4 weeks show a mixed picture: good training variety with open-water swims, a solid long ride, and some running, but the athlete has been ill since 2 August with doctor's orders to avoid sport until at least 11 August — this overrides all planned sessions through that date. Sleep has been severely disrupted since late July (multiple nights under 5 hours, body battery repeatedly below 15), compounding the illness and meaning the return to training on 11 August must be gradual and gated on recovery markers. With the Half Oceanman 5,000m swim 58 days away as the priority race, the immediate focus must be full rest and illness recovery before rebuilding swim volume.

- Respect the doctor's advice strictly — do not attempt any of the 6 August sessions (strength or running); rest completely until 11 August at the earliest and only return if body battery is ≥45 and you feel symptom-free.
- When you return on 11 August, drop the 90-minute run plan and replace with a single easy 30–40 min aerobic swim or very easy run at HR ≤135 bpm to test how the body responds after illness.
- Prioritise sleep aggressively over the next two weeks — your body battery has been critically low (2–11) for multiple consecutive days, which will impair immune recovery and adaptation; aim for 7+ hours nightly before resuming any structured training.
- For the week of 24 August (abroad), plan hotel-pool or open-water swims and bodyweight strength only — flag the long ride on 22 August as needing a hire bike or replacement with a long run/swim, and treat the week as a maintenance-only block.
- Given the illness-forced gap, the Half Oceanman 5,000m swim build will be compressed — when training resumes, prioritise swim volume above all other disciplines and aim to complete at least two open-water sessions per week in the final 6 weeks.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):

DATE	DISCIPLINE	PROPOSED	TYPE
2026-08-06	Strength Training	Full rest — no training of any kind.	SKIP
2026-08-06	Running	Full rest — do not attempt even a walk today.	SKIP
2026-08-07	Swimming	Full rest — postpone swim return until 11 August at earliest.	SKIP
2026-08-08	Cycling	Full rest — no cycling until medical clearance is confirmed on 11 August.	SKIP
2026-08-09	Running	Full rest — this is still within the illness-recovery window.	SKIP
2026-08-11	Running	Replace with a single easy 30–35 min jog at HR ≤135 bpm or, if still feeling unwell, a 30	DECREASE
