Race Targets

Half Oceanman
Oct 03, 2026
In 57 days
Target: 2:05:00
Predicted: ~2:07:30

Treviso 10K Tiramisu Run
Oct 11, 2026
In 65 days
Target: 57:30
Predicted: ~56:39

Marathon
Feb 07, 2027
In 184 days
Target: 4:02:39
Predicted: ~3:59:04

Ironman Italy Cervia
Jun 20, 2027
In 317 days
Target: 11:43:58
Predicted: ~16:33:43

AI Coaching

- The last 4 weeks show a very disrupted training block: a modest mix of open-water swims, two runs (one of which spiked to an alarming avg HR of 179 bpm), a long cycle, and a hike — followed by a full illness-forced shutdown from 2 August onwards. Sleep has been severely compromised across the final two weeks (multiple nights under 5 hours, body battery readings as low as 0–11), confirming the body is under significant stress. With the Half Oceanman 58 days away (swim 5,000m target), the immediate priority is a safe, gradual return to training from 11 August, rebuilding swim volume first before layering intensity back in.
- Prioritise sleep above all else this week — your body battery has been critically low (0–11) for several consecutive days, and no training adaptation is possible without adequate recovery; aim for 7–8 hours per night from 6 August onwards.
 - When you return to training on 11 August, treat the first full week (Wk8) as a test week only: HR-capped easy efforts, reduced distances, and an immediate bail-out rule if any illness symptoms return — do not chase lost fitness yet.
 - The Half Oceanman swim (5,000m at 2:30/100m) is your nearest A-race in 58 days; rebuild swim volume as the first priority from Wk8, targeting 3 pool or open-water sessions per week and reaching 3,500–4,000m total weekly swim distance before the end of August.
 - The 18 July run at avg HR 179 bpm suggests you attempted a hard effort without adequate recovery — once training resumes, enforce a strict HR ceiling of 145 bpm for all runs until you have two consecutive weeks of clean data, given the illness and disrupted sleep context.
 - The abroad week of 24 August (Wk10) should be treated as a swim-and-run week only; flag the 100km Saturday ride as contingent on bike access and have the replacement open-water swim session ready as the default plan.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):

DATE	DISCIPLINE	PROPOSED	TYPE
2026-08-11	Swimming	Easy 30-min pool session, 1,000m only (no pace target) — technique drills and single-lengt	DECREASE
2026-08-13	Cycling	Easy 30-min Z2 spin at 110–130W on flat terrain only; cut short immediately if HR exceeds	DECREASE
2026-08-15	Cycling	60-min easy ride, 25–30km at 110–140W with HR ceiling of 140 bpm; if HR gate is breached a	DECREASE
2026-08-22	Cycling	Morning open-water swim 45–60 min (1,500–2,000m) as planned; afternoon ride capped at 60–7	DECREASE
2026-08-29	Cycling	If bike is unavailable abroad: 75-min open-water or pool swim (2,200–2,500m at 2:25–2:30/1	REPLACE
2026-08-30	Running	Cap at 15–16km @ 6:30–6:45/km (easy aerobic, HR ≤145 bpm) — this is the day after a 100km	DECREASE
