Race Targets

Half Oceanman
Oct 03, 2026
In 63 days
Target: 2:05:00
Predicted: ~2:07:30

Treviso 10K Tiramisu Run
Oct 11, 2026
In 71 days
Target: 57:30
Predicted: ~1:01:53

Marathon
Feb 07, 2027
In 190 days
Target: 4:02:39
Predicted: ~4:21:08

Ironman Italy Cervia
Jun 20, 2027
In 323 days
Target: 11:43:58
Predicted: ~16:55:47

🤖 AI Coaching

The last 4 weeks show very erratic recovery with chronically poor sleep (multiple nights under 5 hours, including 41 min on July 27 and near-zero body battery on several days), which is undermining training absorption despite reasonable session diversity across swim, bike, and run. The high-intensity run on July 18 (avg HR 179 bpm) against a backdrop of depleted body battery signals accumulated fatigue that risks injury if not addressed immediately. With the Half Oceanman (5,000m swim) only 63 days away, the priority must shift to sleep-gated recovery, consistent swim volume, and protecting aerobic base.

- Target 7+ hours of sleep every night this week — body battery has been below 30 on multiple mornings and no amount of training will build fitness on this foundation; treat sleep as the primary training intervention right now.
- Prioritise swim sessions above all other disciplines for the next 8 weeks: you need consistent 2,000–2,500m pool sessions 2–3 times per week to reach race-ready 5,000m open-water fitness for the Half Oceanman on October 3.
- Gate every session this week to morning body battery: if below 45, replace any planned workout with a 20-minute walk only — the July 18 run at HR 179 and the subsequent crash in wellness data confirm you are not absorbing training stress at current recovery levels.
- Avoid any running intensity (tempo, intervals) until average nightly sleep consistently exceeds 6 hours for 5 consecutive nights; easy aerobic running at HR ≤140 bpm is the maximum appropriate effort given current fatigue.
- Begin open-water swim rehearsal sets in August — at least one session per week in the sea at race-simulation pace (2:30/100m) to build confidence and specificity for the Half Oceanman 5,000m distance.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):

DATE	DISCIPLINE	PROPOSED	TYPE
2026-08-01	Rest	Full rest day — no activity whatsoever. Body battery at 2 on July 30 and 41 min sleep on J	SKIP
2026-08-09	Swimming	45–50 min open-water or pool swim at easy aerobic effort, targeting 1,500–1,800m at 2:35/1	REPLACE
2026-08-22	Swimming	Morning: 60 min open-water sea swim at 2:25–2:30/100m targeting 2,000m (Half Oceanman race	REPLACE
2026-08-29	Swimming	Upgrade Friday Aug 28 pool session to a 75 min race-simulation set: 500m warm-up, 4×600m @	INCREASE

2026-10-03	Rest	Full rest or very short 10-min shakeout swim (200m easy) only — this is Half Oceanman race	REPLACE
2026-10-11	Rest	Full rest or optional 10-min easy jog warm-up only — this is Treviso 10K Tiramisu Run race	REPLACE
