AI Coaching

Over the last 4 weeks, training has been inconsistent across all three disciplines, with sleep chronically short (many nights under 4 hours) and body battery frequently depleted, indicating significant accumulated fatigue. Running volume is very low relative to both the imminent Treviso 10K and the marathon target, with only one run session logged in the period. Bike work has been the most consistent discipline, while swim volume picked up late in the block with a strong 5.2km open-water session on Oct 3.

- Tomorrow's Treviso 10K falls after a week of minimal structured training and poor sleep — aim for a controlled, even-paced effort around 5:45–5:55/km rather than going out hard; treat it as a quality tempo stimulus rather than an all-out race.
- Sleep is the single biggest limiter in this block: averaging under 4 hours on many nights is undermining adaptation and recovery — prioritise 7–8 hours nightly starting tonight and through the post-race recovery week.
- Running volume is critically low heading into a marathon block — after the Treviso race and one full recovery day, gradually reintroduce easy running 3x per week from Oct 13 onwards, building from 30–40 min easy efforts before reintroducing intervals.
- The 5K open-water swim race on Oct 25 is only 2 weeks away — ensure the Wk17 long ride on Oct 17 does not leave you fatigued heading into race week, and treat Oct 23–24 as low-stress days to arrive fresh for the swim.
- Consider dropping the AI-added third session on Oct 13 (easy run) given three sessions are already stacked on that Tuesday post-race — consolidate to swim plus easy bike only to avoid overcrowding recovery.

Proposed plan changes (review on the website, apply via "Apply to Dashboard"):

DATE	DISCIPLINE	PROPOSED	TYPE
2026-10-13	Running	Remove the AI-added run session entirely; keep only the pool swim and the easy cycling spi	SKIP
2026-10-15	Running	Replace with 40 min easy run at 6:30–7:00/km — no intervals this week; reintroduce structu	REPLACE
2026-10-17	Cycling	Cap at 60km at 128–177W (Z2) only — skip the tempo blocks this week; build back to 80km+ i	DECREASE
2026-10-18	Running	Further cap at 10–11km at 6:45–7:00/km — prioritise easy aerobic time on feet rather than	DECREASE
2026-10-23	Rest	Full rest only — cancel the Friday pool swim session and treat Oct 23 as a complete rest d	REPLACE
2026-10-24	Cycling	Replace with a short 30–40 min easy spin at under 128W (Z1) with a few light cadence drill	DECREASE
